

Scrolling Horizontally in Google Sheets with Evoluent VerticalMouse 4 and VerticalMouse D

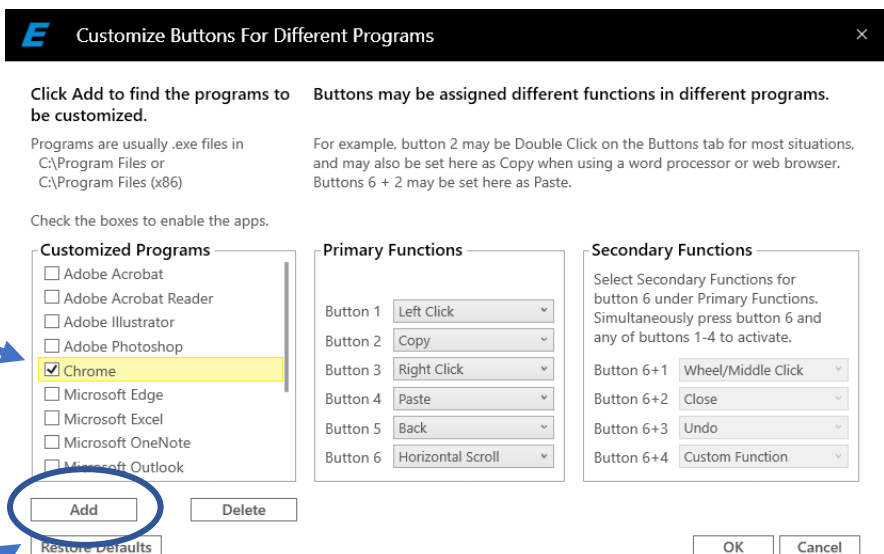

These instructions are designed for Evolent MouseManager v.6.0.9.2.

1. Download Evolent MouseManager: <https://evolent.com/support/download/>
2. Connect Evolent VerticalMouse to your computer.

3. Click *Customize Buttons For Different Programs*

4. Depending on what browser you are using, select it on the list. In this example we are using *Google Chrome*.

If you can't find your browser on the list, click *Add* to find the program from your computer.

Programs are usually .exe files in

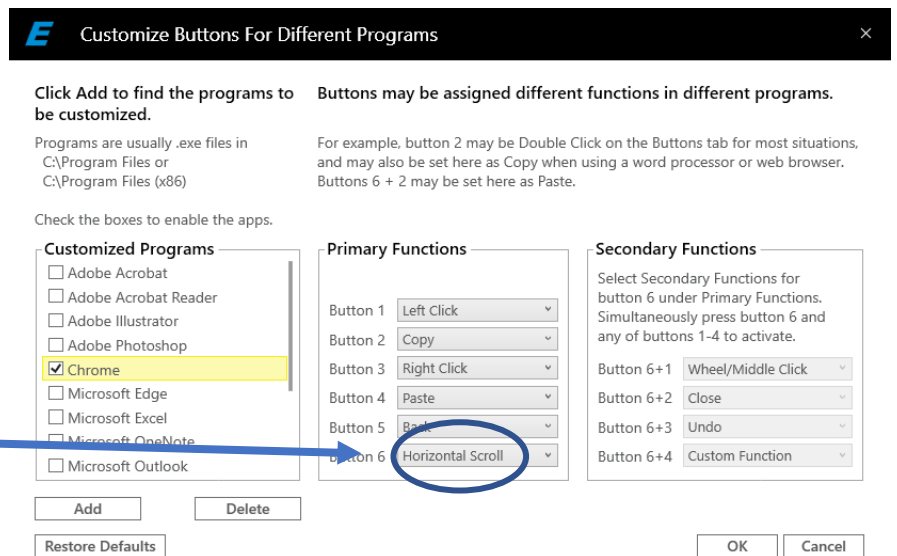

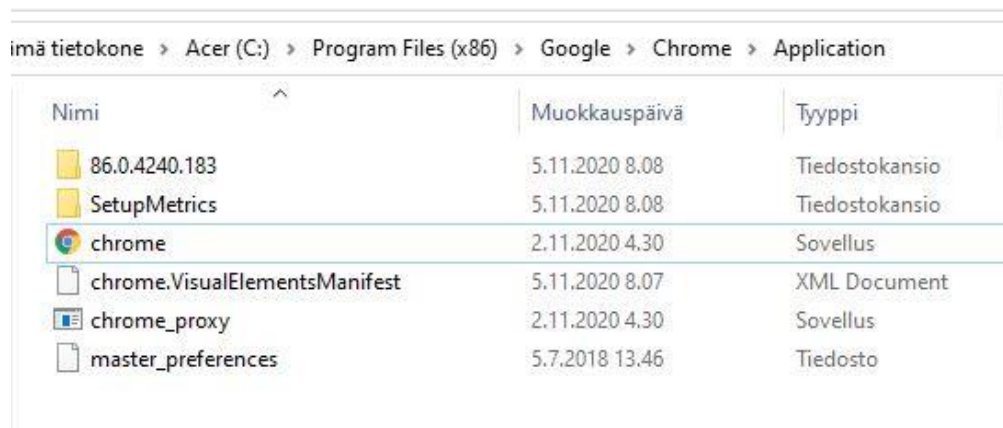

C:\Program Files or
C:\Program Files (x86)

Depending on the system the locations of the programs can vary.

As we are using Google Chrome as an example, picture shows one possible location of Google Chrome.

You can also find the same path written down below.

C:
↓
Program Files (x86)
or
Program Files
↓
Google
↓
Chrome
↓
Application
↓
chrome
or
chrome.exe

5. Make sure *Horizontal Scroll* is assigned to button 6

6. Press OK

Now you can scroll horizontally in Google Sheets (when used with Google Chrome) by holding down lower thumb button and rolling the wheel
